

Sustainable Month

ÉCOle de Kyodai 2014

The 1st Project Contest

for the Establishment of a Sustainable Campus

Entry Requirements

- The contest is open to Kyoto University students (undergraduate, master's, doctoral, international, researchers, and auditors).
- Students may enter individually or in teams of up to three people.
- * All applications must be endorsed by a faculty member of Kyoto University.

Application Period and Judging Process

Application period : April 25 to May 30, 2014

Judging Process

1. Document screening

- Applicants must submit the designated application documents, providing the following information : concept and significance of the project, details of the projects execution, details of the organization of the project, project execution plan, estimated cost, anticipated influence of the project

2. Presentation examination

- During Sustainable Month, applicants will be screened based on a public presentation (15 min. Power Point presentation).

Concept

* As part of the "Sustainable Months" event in June 2014, the contest seeks to promote the concept of a "sustainable campus" by inviting students propose a practical project for on-campus environmental impact reduction.

The project should be executable within the 2014 financial year (approx. five months for planning and four months for execution), and should have a relatively low budget (up to JPY 300,000 per project.).

Awards & Prizes

First Prize (one award)

- **Project funding of JPY 300,000**
- **Travel and accommodation expenses** to participate in the Association for the Advancement of Sustainability in Higher Education (AASHE) Annual Conference on Oct. 26-29, 2014 in **Portland Oregon**. During the conference, the prize-winners will give a presentation on their project and its role as part of Kyoto University's efforts to create a sustainable campus.

Second Prize: award for excellence (two awards)

- **Project funding of JPY 300,000**
- **Travel and accommodation expenses** to participate in the CAS-Net JAPAN Annual Conference at **Hokkaido University** on November 26, 2014. During the conference, the prize-winners will give a presentation on their project and its role as part of Kyoto University's efforts to create a sustainable campus.
